

Online people aren't who they say they are

Never give info about your life

Locks need to be on the sight to be safe

If someone messages you don't reply if you don't know who they are

Never go on apps if they say your not old enough

Even though you are old enough to go on apps be careful of haters.

Safety is important when you go on sites

Ask an adult before you do anything online or share information about you.

For safety reasons don't make online friends or put up your photograph.

To be safe don't share your account info

Even if they have a profile picture don't think that's them.

You can stay safe online if you keep your details to yourself and be aware of other people

Stay
Safe
online!!!
